It may be an asset flip and all, but at least it's cheap, honest about what it provides, and not broken on arrival. I had some fun making a video using this game as an example. Check out the second half of the video if you want to see some gameplay and a brief overview.

<https://www.youtube.com/watch?v=ix0ZuR7XO9k>. As for a small game, it can absolutely match the price(coz i got it for only 1 RMB hhhhhhhh). it's a real fps game, as what the name called, you just wait(you can also escape) for the attack of insects and shooooooooooot them without thinking!

to be honest, it's not a 3A game totally, and even not a good game in the eye of 2018's players, but i like it because it make me think of my CHILDHOOD!

at that time i played games in 4399.com and 7k7k.com. which are filled with free small games like [Attcak Of Insects](#). every boring summer day i set before my old computer and spended all my time with them. its really unforgettable memory!

now i am an adult. playing expensive beautiful 3A games with nice computer. mama will never beat me for taking too much playing games. but i know. i lost my childhood FOREVER.. mother russia! ♥♥♥♥ing amazing game.

[just run around and kill♥♥♥♥♥♥. This game is a modern artpiece. from the visuals to the gameplay and the russian text to fully immerse yourself. this was by far the best game i have ever witnessed so far. 10/10. Clearly a cheaply made game. the modles are a rip off from starship troopers and the voice over is clearly stolen from Unreal Tournament but at 47p you can't complain!.](#)

[Attack of Insects is basically an indie love letter to the Starship Troopers movie series with some Unreal Tournament sound clips tossed in for good measure. It looks, sounds, and plays like a Netflix straight to DVD B-movie. Toss in a skill tree and upgrade system. and you have a solid little shooter that is definitely worth the low asking price of \\$1.99.](#)

[to be fair. this game was okay. but i ran it on the lowest settings i could and it runs at 8 fps average. which makes me want my 10 cents back.](#)

HAHA!!! YES!!! I actually really enjoy this game. Simple, fun, and worth the change spent to acquire it.

Like Starship Troopers and want to blast some bugs? Get this game, then KILL THEM, KILL THEM ALL!!!!

Like listening to Unreal Tournament 'headshot' 'triple kill' announcer audio? Get this game. You'll get your fix. lol

It's a very simple game that when maxed out is a lot of fun. Also getting the assistant insect is fun except when the other soldiers get near it and begin killing it. : (Find myself trying to kill soldiers to save my stupid glowing bug buddy. haha

One word of caution, don't shoot the other soldiers on the field. They are a bit unforgiving about getting friendly fire and will light your rear up quick if you shoot them. This means the starting gatling fun needs to be aimed well.

Good simple game completely stocked FULL OF BUGS!!! In a good way. Thanks BadWolf Games. I'm digging this. Cheers!! <https://www.youtube.com/watch?v=ix0ZuR7XO9k>. I love the drum kit sfx for weapons. Game succeeds in being "so bad it's good" but also being pretty good for what it is. Cheap fun. Suprisingly fun. pretty good game. oddly, but very therapeutic!. RAMPAGE !!!
